

Name: _____

Effects of Climate Change

Each station has a graph that is showing an effect of climate change. Analyze the data by filling in the chart below. We will do the first one together as a class.

Effect	What patterns do you see between the graphs and what can you conclude from this data?	What do you think the consequences of this change will have on our earth?
Global Temperature		
Sea Level Change		
Land area Lost		
Sea Ice Caps		
Major Hurricanes		
Global land and ocean temperature		
Acidification of the ocean		
Coastal flooding		
Building loss by fires		
Fish location
