# Extension 3.1AB Minerals

**Description:** Students will "collect" a selection of minerals from internet sites and create a document to share their collection. You will need to complete the chart on both sides of the paper.

**Websites:** The following websites can be good references to use to complete this assignment.

[http://www.galleries.com/Minerals\\_By\\_Name](http://www.galleries.com/Minerals_By_Name)

<http://www.minerals.net/>

<http://geology.com/minerals/>

<http://geogallery.si.edu/index.php/en/minerals/all/mineral/any>

**Information for each mineral:** name, characteristics (hardness, luster, streak, or fracture), uses, why I chose it?

## My Mineral Collection

Name	Picture	Characteristics	Uses
Amethyst		Hardness is a 7, it has vitreous luster, conchoidal fracture and is brittle.	Inexpensive jewelry

Name	Picture	Characteristics	Uses
