

Identifying Earth's Systems Interactions

Activity 1 - Identify the Spheres

Directions - Fill in the boxes below with the correct spheres of Earth that are represented in the image below.

Analysis Questions

1. If a person is swimming in the water, what spheres are involved?
2. Explain how a volcanic eruption could affect the spheres?
3. What CCC (cross cutting concept) are each of the different spheres representing?

Activity 2 - Earth Systems Poster

In the space below, create a colored poster showing the 5 main Earth spheres interacting with one another. Then label and explain the interactions.
