

Guest Speaker

Rene Fleming

City of St. George: Water and Energy Conservation Coordinator

***On the back of this sheet, write down two questions you could ask the guest speaker about water in our area.**

Answer the following questions from Mrs. Fleming's presentation:

What is a Water and Energy Conservation Coordinator? What is her purpose?

What type of responsibilities does Mrs. Fleming have as the coordinator?

Why is water such an important resource to us in this area? How many sunny days a year do we have on average?

What is a watershed?

From where does the water that fills our lakes, streams, and aquifers come?

What is an off-stream reservoir?

Why was Sand Hallow Reservoir placed where it is?

What do the following water terms mean?

Wastewater:

Culinary water:

Grey water:

What is most of our water used for in Washington County?

On average, how much water does each person in St. George use in a day?

What was the most important thing you learned from this presentation?

What attitudes or behaviors could you change with the new information you learned today (things that might make our community a better place in which to live)?

Divide the back of this paper into two columns. In one column, write down all of the pros for the planned Lake Powell pipeline. In the other, write down as many cons as you can.
