Titanium

47.867

3

- titanium is found in the earth's crust
- highest producing places are Australia, South Africa and Canada.
- Used for airframes and engines.
- Reacts with Dilute aqueous hydrofluoric
- It's silver and very bumpy.
- Combines with hydrogen, nitrogen, carbon and boron
- It's found in its natural state

4

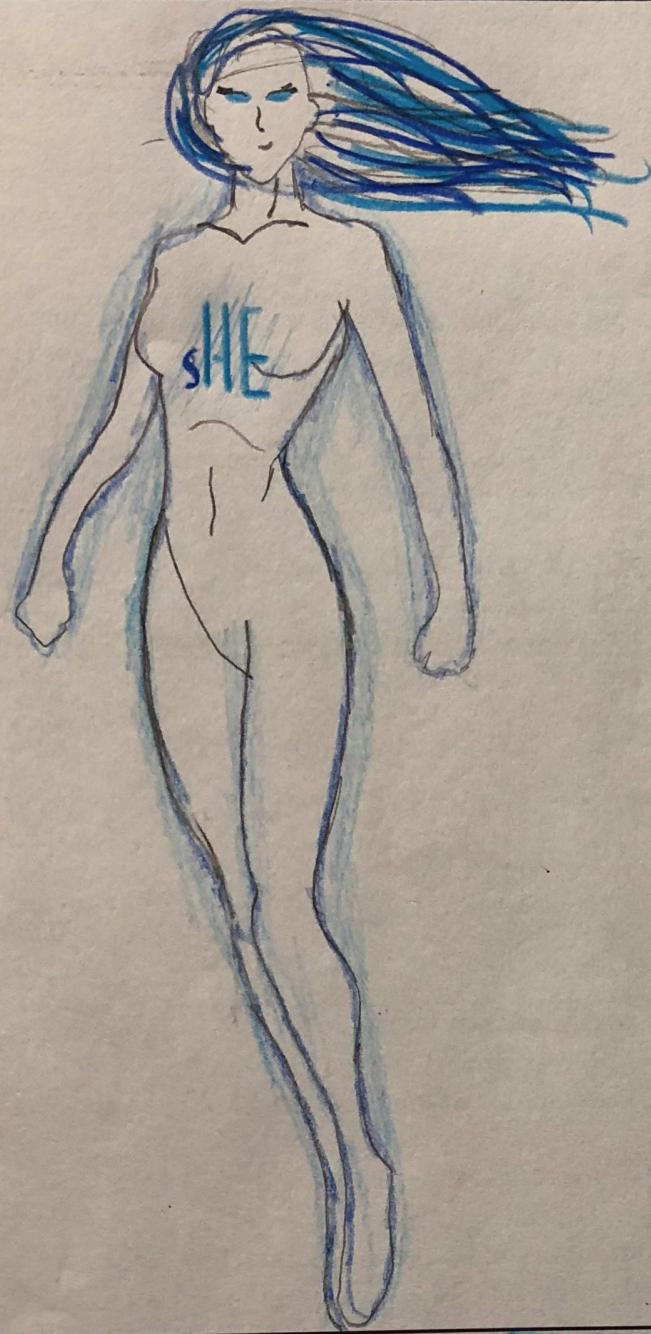

Titanium lady is a super strong and light. Since she has a full titanium body suit, it is resistant to corrosion in sea water and chlorine so she can stay under water as long as she wants. She uses her powers to save injured ocean animals.

5

A few years ago when she was on vacation, she went on a scuba diving trip by Australia and hit her head on a titanium ore really hard underwater. Somehow giving her these amazing powers.

# SHELIUM -on- HIGH

1

2

Helium  
4.0026

3

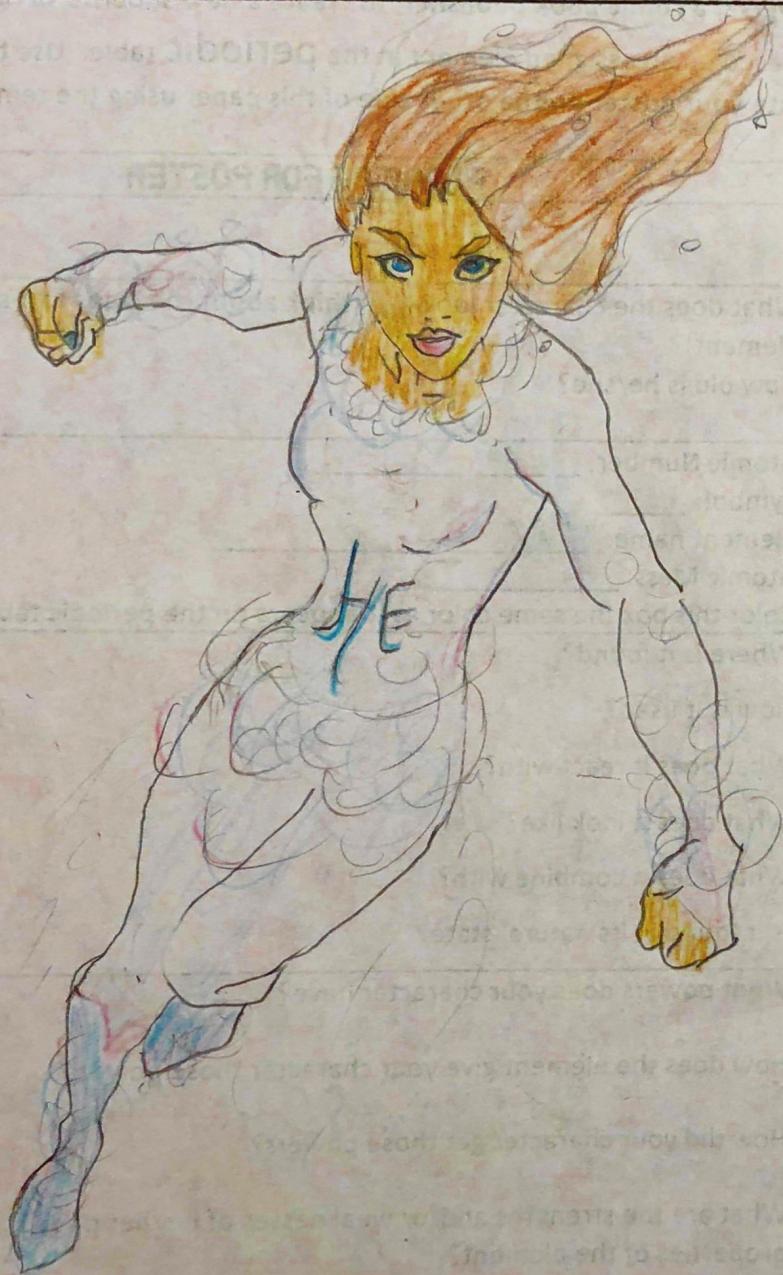

- Helium is found in the ground
- It is used to inflate things
- Helium reacts with nothing
- Helium combines with nothing
- Helium is sort of found in its natural state

4

Her real name is Rachel Winters <sup>13</sup> she used to be an ordinary girl, but one day at a birthday party she did something crazy! She inhaled so much helium that she passed out. She woke up the next day <sup>14</sup> noticed she could fly <sup>15</sup> by inflating herself with the helium she inhaled. She used to live in Texas <sup>16</sup> but now she has to live in her blimp hideout. Now she uses her power to save lives.

He  
Helium

40026

4

- She flies
- Can make people  
light headed
- Form to any  
shape
- Likes open  
area
- Makes her voice  
funny

Helie girl just wanted to have a funny voice. 5  
She inhaled so much helium, that she started to gain it into her normal body. She flew up and had to learned how to control it. She now lives fighting bad guys and helping others.

# helium girl - libby anderson

He

Helium

4.0026

4

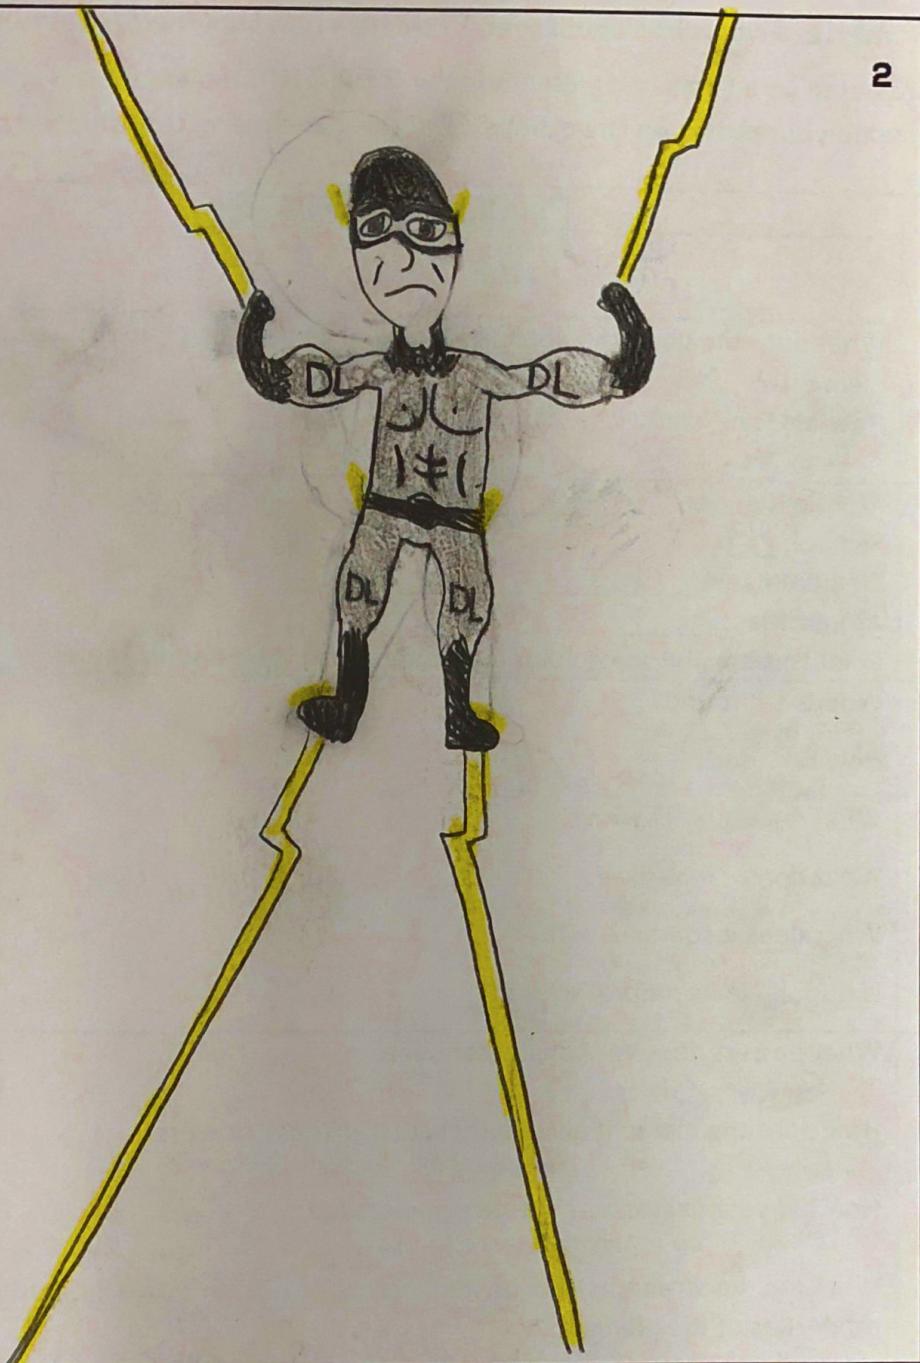

To find helium, you dig it out of the ground. Helium is used to fill blimps, balloons and scientific balloons. Helium doesn't react with any other elements. Helium is colorless and odorless. Helium combines with oxygen, hydrogen and halides compounds. Helium is found in its natural state because it is a natural gas.

5

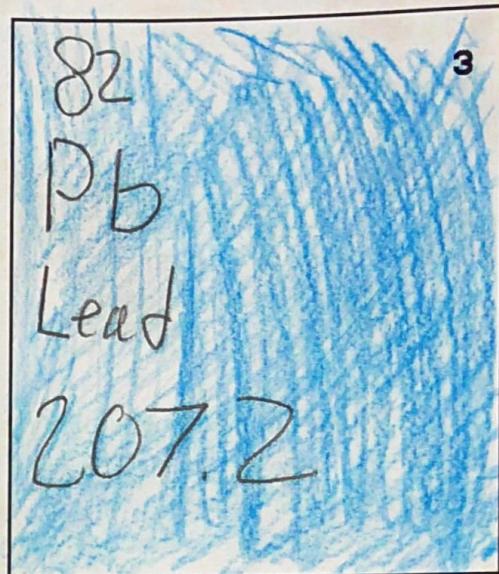

Libby Anderson (helium girl) can fly, she has invisibility, and uses helium to fight the villains. She lives underground, because helium comes from the ground. Libby got her powers because she breathed in a lot of helium at birthday parties, and she suddenly got helium powers. Helium girl lives in her hideout underground, and sleeps in a chamber full of helium. Helium girl doesn't have an arch nemesis, but she fights the villains in the city. Both of her parents were born with helium powers, but Libby wasn't. Although, she grew from a plant, so did her parents.

# Dark Lead

1

2

3

- Lead is found in the Earth's crust.
  - It is used in batteries not weights.
  - It is soft and heavy.
  - It combines with oxygen
- Lead is found in anglesite.

4

Dark Lead has the ability to fly with his electricity and he is super strong. The element gives him power because Lead is in batteries and weights. He got his power from a scientist by accidentally swallowing Lead and getting electrified, he turned bad so he could take over the world. His only weakness is heat he can't get too hot or he will lose his power for a little. His real name is Ryan Black. He is mix with oxygen he becomes extremely dangerous.

## Au

Gold

196.97

1. gold was first found in a river-bed
2. gold is usually used for jewelry
3. gold reacts with chlorine gas
4. gold has a metallic-yellow color
5. gold is very valuable.

Sara was just a normal girl, until she bought a very special necklace. But not just a silver plain necklace, a gold necklace. And whenever she puts it on, she no longer is Sara, she is Gold Girl. Gold Girl can shoot sharp, shiny gold from her bare hands (with maybe a bit of help from the gloves). But a lot of villains are out for her necklace, because without it, she is just Sara.

## Facts

1. It is found in the Sun, stars, and Jupiter.
2. It reacts with heat, sparks, and flame.
3. It combines with Oxygen.
4. It is found in its natural state.
5. It's used for rockets, and explosions.

5

I used to be a human, well maybe I'm still human, but anyway I was an astronaut and was going to be the first human on Jupiter. Instead though I crashed, and got too much hydrogen which made me a part of that element. I returned back to planet earth, and discovered I could make explosions if there were sparks, flame, or heat. However my arch nemesis Nicole tried to stop me. One day though I defeated her, and put her in prison for good.
