

The Magic Box

As the teacher demonstrates the “Magic Box,” make observations. **Observations** are made through our senses, or by recording information using **scientific** tools and instruments. Any data recorded during an experiment can be called an **observation**. Record your observations on this paper.

Observation #1	Observation #2
Observation #3	Observation #4
Observation #5	Observation #6
Observation #7	Observation #8
Observation #9	Observation #10

Draw a picture of what YOU think the Magic Box looks like inside.
