

Name: _____

UTAH THROUGH TIME

From studying the fossil and rock record in Utah, scientists have been able to piece together what Utah looked like in the past. In this activity, you are going to travel back through time and keep a diary. You will use the website below to find out what Utah was like in each of the different time periods listed.

Website: <http://geology.utah.gov/utahgeo/geo/geohistory2.htm>

Click on the back arrow (on the webpage) in order to move back in time.

Procedures:

1. Look at the map to the right to see where St. George is in Utah (star). Use this location as you describe what Utah looks like during the different time periods.
2. Describe any unusual events. Use the written information on the website to help.
3. Include at least two facts for each time period.

1. PALEOZOIC:

-
-

2. EARLY JURASSIC:

-
-

3. LATE JURASSIC:

-
-

4. LATE CRETACEOUS:

-
-

5. PALEOCENE:

-

-

6. EOCENE:

-

-

7. OLIGOCENE:

-

-

8. MIOCENE:

-

-

9. PLEISTOCENE:

-

-
