#3

| TERM              | DEFINITION | PICTURE |
|-------------------|------------|---------|
| Matter            |            |         |
| Atoms             |            |         |
| Nucleus           |            |         |
| Proton            |            |         |
| Neutron           |            |         |
| Electron          |            |         |
| Element           |            |         |
| Molecule          |            |         |
| Chemical Property |            |         |
| Physical Property |            |         |
| Phase Change      |            |         |
| Dissolve          |            |         |
| Density           |            |         |
| Flammable         |            |         |

| <b>TERM</b>            | <b>DEFINITION</b> | <b>PICTURE</b> |
|------------------------|-------------------|----------------|
| Corrode                |                   |                |
| Combust                |                   |                |
| Malleable              |                   |                |
| Chemical Change        |                   |                |
| Physical Change        |                   |                |
| Reaction               |                   |                |
| Precipitate            |                   |                |
| Chemical Equation      |                   |                |
| Synthetic              |                   |                |
| Reactants              |                   |                |
| Products               |                   |                |
| Conservation of Matter |                   |                |
| Convection             |                   |                |
| Conduction             |                   |                |
| Radiation              |                   |                |
| Insulator              |                   |                |
